

**Pre Filter  
87 (P2 NR)**

**MATERIALS:**

**Body:** Filtering material

**Box:** ABS

**FEATURES**

Pre-filter against solid or liquid particles. Class P2 NR (Single Use).  
Suitable for half mask Respir II.

**APPLICATION FIELD**

The suitable filter will be chosen depending on the risk.

These filters can only be used when: Concentration of oxygen  $\geq 19,5\%$  volume. The selection of the filter must be done depending on the kind of contaminant, filter's capacity, mask's leakage according to standard, OEL and the concentration at the working area.

If one of these conditions is not respected, a higher protection must be used.

**PRODUCT AND COMPANY CERTIFICATION**

Meets the European Armonized Standard **EN 143** and is included in our company certification ISO 9001:2000
